

## **Operations II BOM Change Audit Report**

A utility that records a summary of changes to a BOM whenever a job Bill of Materials is edited.

This record changes when a BOM is edited in Job Management and Stock Details.

The Utility will take a snapshot of a Bill of materials and summarise the totals units for all components both prior and after any Job edit being made.

The following information will then be recorded in a new table once the edit is saved.

- New part added and quantity
- part removed and quantity
- quantity increase of any part
- quantity decrease of any part
- job number
- Time changed
- date changed
- computer changed on
- PC login
- Operations User logged in.

A new menu option will be added to “Operations II > Parts > Reports > BOM Change Report”.

The report can be run by date range and job number and sorted by date and time and part code.

The report will print out the details above along with component part code description, sales order number, customer account and customer Name and Sales Order Line Description.

**Operations II BOM Change Audit Report - £550.00**

**Annual Maintenance and Support - £125.00**
