

SOP Display (stock view)

Bespoke Process

The purpose of this utility is to allow for the following values for the selected warehouse to be displayed on the SOP / Invoicing details form

- In Stock,
- Free Stock,
- Allocated,
- Quantity on Sales Order
- Quantity on Purchase Orders

The fields will be provided on a read only basis and will be updated automatically based on the warehouse details of the selected line. The utility will be applied to all document types (Order, Delivery etc).

The display of these fields will be controlled by a new setting on the SOP / Invoicing Set Options form captioned "Show Warehouse Totals on SOP Details Form". If this option is checked the additional fields will be displayed. If the option is left unchecked (the default setting) the fields will not be displayed and the SOP / invoicing form will display as standard.

Note: The full Stock Module is required in order for this add-on to function correctly.

SOP Display (stock view) - £190.00

Annual Maintenance and Support - £50.00
