BRIDGE WMS

The Complete Warehouse Solution

Overview

Bridge WMS is a comprehensive software package that utilises the multiple benefits of barcode technology. This user-friendly solution is designed to ensure accurate and efficient processes throughout the supply chain ultimately for better Warehouse Management. Bridge WMS incorporates all aspects of day-to-day routine including, Goods Receipts, Picking Orders, Stock Movements, Transfer and Stock Takes, the solution provides real time updates for the most 'live' warehouse you could need.

Stock Manager

Allows you to track the purchase, storage, and sales of your products at every stage to ensure product availability and optimise the warehouse. It helps businesses keep track of their stock levels, so they can make informed decisions about how much to purchase/produce and when.

Key Features:

- Traceability/Serial/Batch.
- Multilocation (Bin/Bay/Aisle/WH).
- Stock Replens.
- Stock Requisitions.
- Stock Lookup.
- Stock Taking.
- Stock Movements.

Receipt Manager

Allows you to centralise and track every order from creation to receiving goods. It is all about quickly and effectively receiving the delivered goods into your inventory. You will observe the progression of your orders, check on outstanding orders or view all received orders.

Key Features:

- Manage Multiple Orders.
- Create Purchase Orders.
- EDI Link.
- Control Quality/condition.
- Product Labelling.
- Multiple Approval Levels.
- Put Away.

Despatch Manager

Provides a platform to centralise and track every order from receiving confirmation to delivery. Observe the progression of your orders in real time, check on outstanding orders or view all the completed orders. It will increase efficiency in picking and decrease longevity of outstanding orders.

Key Features:

- Multiple Picking/Packing options.
- Courier Integration.
- Product Despatch Labelling.
- Assigning Pickers to Orders.
- Visibility of all Orders.
- POD Integration.
- Delivery Notes/Packing List Production.

Benefits

No transcription/handwriting errors means improved accuracy. Reduced duplication of transactions results in enhanced utilisation of staff. Time saved during work hours can be allocated to focus on customers. The standard modules can be customised to suit you as your company grows.

R.O.I.

- 80% average time saved during stocktake.
